

Spot Testing Kit

Information Sheet

Here are the steps to taking samples with your **Spot Testing Kit** from Environmental Research Technologies:

- ④ **Step 1:** Gently remove the Mycostrip® from it's backing, being careful not to tear the tabs or contaminate the strip by touching any surface.
- ④ **Step 2:** With the adhesive side away from you, grip the white tabs with your thumb and index finger and while apply pressure *push* the adhesive side out.
- ④ **Step 3:** Lightly touch the surface to be sampled and apply pressure until *stop tabs* come into contact with surface.
- ④ **Step 4:** Pull away from the surface and immediately place long ways onto the provided microscope slide.
- ④ **Step 5:** With a **permanent marker**, be sure to number the slide and record where the sample was taken on provided record sheet.

Once you have completed all of your samples:

1. Place slides back into the plastic mailer and seal the flap
2. Send **slides, mailer and *completed* Record Sheet** to:

Spot Testing Kit
Environmental Research Technologies
4401 North I-35 suite 218
Denton TX, 76207

Record Sheet

Property Owner _____

Testing Date _____
